Subject Index

A–B

Aluminum
- Additive for loss of shakeout . . . 1
- Alloys for elevated temperature properties . . . 777
- Analysis techniques for phosphorus and antimony . . . 495
- Composites for higher performance . . . 285
- Computer simulation of solidification of plates . . . 715
- Degassing . . . 147
- Effect of time of solution treatment on properties . . . 511
- Effects of trace elements on fluidity . . . 701
- Effects of zinc . . . 17
- Evaluation of processing variable for AlSi castings . . . 797
- Hydrogen content . . . 147
- Low pressure sand casting process . . . 785
- Magnesium removal . . . 385
- Methods of measuring modification . . . 159
- Microporosity . . . 47
- Microstructure finite element and numerical analysis . . . 219
- Monitoring heat treatment with resistivity . . . 9
- Rules for porosity-free castings . . . 753
- Study of stress/strain distribution . . . 219
- Tilt pouring . . . 793

Austempered ductile iron
- Effect of manganese . . . 255
- Heat treatment for high hardness and impact strength . . . 683
- Strain hardening mechanism . . . 577
- properties . . . 577

Austempering; Effect of austempering temperature on gray iron . . . 249
Automation; Casting finishing . . . 243

Bronze; Effect on properties of heat treatment and manganese . . . 671

C

Cast iron
- Disposable insulating boards in ladles . . . 177
- Fusion welding . . . 133
- Phase diagrams . . . 391

Cast irons; Effect of graphite morphology on matrix structure . . . 545
Centrifugal pump for copper base . . . 115
Ceramic filters; steel . . . 85
Charge materials; Changes in quality . . . 417
Coating; Method of measuring permeability in EPC . . . 589
Cold box cores; Phenolic urethane with higher hot strength . . . 187
Cold box
- Sand reclamation . . . 433
- Sulfur nitrogen free process . . . 381
- Work environment and shakeout . . . 433

Compacted graphite iron; Graphite growth . . . 537
Compacted graphite; Graphite formation . . . 927
Compactibility; Improvement in green sand by additions . . . 271
Composits
- Aluminum squeeze castings . . . 285
- Improve properties in magnesium castings . . . 667
- Property enhancement with ceramic fibers . . . 747

Computer simulation
- Aluminum plates . . . 715
- Feeding range . . . 373
- Solidification of gray iron, aluminum and steel . . . 757
- Solidification of uranium alloy . . . 349
- Solidification with small computer . . . 529

Computers; Using to improve production of patterns . . . 205
Copper-base alloys
- Centrifugal pump . . . 115
- Detoxification of sands contaminated with lead . . . 725

Copper
- Deoxidation . . . 155
- Effect on ductile iron . . . 557
- Effect on microporosity in aluminum . . . 47

Core assembly; Adhesives . . . 291
Cores; Phenolic resin for aluminum casting . . . 1
Corrosion; Inhibiting heat treatment for aluminum bronzes . . . 97
Cost duplex stainless steel; Production techniques and properties . 123
Counter gravity metal flow vacuum to assist filling of investment and sand molds . . . 209
Cupola
- Plasma fired . . . 323
- Plasma for operations enhancement . . . 809

D

Defects; Inclusions . . . 29
Desulfurization; Technique and current use . . . 815
Dimensional tolerances; V-process . . . 343
Ductile iron; Variables causing carbon flotation . . . 823
Ductile iron
- Crack initiation of propagation in quench and tempered . . . 631
- Degenerate graphite in heavy sections . . . 601
- Desulfurization . . . 815
- Effects of molybdenum, copper and nickel . . . 557
- Fatigue . . . 265
- Ferritic, fracture mechanisms . . . 621
- Fracture of ferritic iron . . . 621
- Heat treatment . . . 645
- Holding of treated iron . . . 609
- Holding treated iron . . . 57
- Micromechanism of fracture . . . 637
- Welding with steel . . . 879

E

EPC; Method for measuring permeability of coating . . . 589

F

Fatigue; Ductile iron . . . 265
Filters; Removal of nonmetallic inclusions from steel . . . 215
Finishing
- Automation . . . 243
- Use of manipulators . . . 913

Fracture of ferritic ductile iron . . . 621

G

Gating
- Causes of sand inclusions . . . 277
- Gravity tilt casting . . . 519

Gravity tilt castings; Gating . . . 519
Gray iron; Effect of Si, Mn, Cu, Ni, Mo and Su on strength and microstructure . . . 889
Gray iron
- Alloy elements effect on strength and microstructure . . . 889
- Effect of manganese and sulfur . . . 863

Gray irons; Effect of electromagnetics . . . 739

Green sand
Additives for improving compactibility . . . 271
Computer analysis of various systems . . . 451
Design and operation of sand system . . . 451
Mathematical model for tensile strength . . . 443
Properties with 8–15% bentonite . . . 71

H

Heat Treatment
Aluminum bronzes . . . 97
Ductile iron . . . 645
Effect on bronze . . . 671
Using resistivity to monitor in aluminum . . . 9

I

Impact; White irons . . . 297
Inclusions; Relation to mold-metal reaction . . . 29
Induction furnaces; Use for holding treated ductile iron . . . 57

L

Ladle linings
Disposable insulating boards . . . 177
Expendable ladle board process for steel . . . 93
Insulated for steel use . . . 173
Landfill; Leachate quality . . . 935
Lead; Detoxification of copper-base sands . . . 725

M

Magnesium
Effect on microporosity in aluminum . . . 47
Properties improved with graphite fibers . . . 667
Manganese
Effect on austempered ductile iron . . . 255
Effect on bronze . . . 671
Effect on gray iron . . . 863
Manipulators; Use in finishing department . . . 913
Material handling; Overhead power and free conveyors . . . 735
Mathematical modeling of solidification . . . 335
Mechanical properties; Aluminum bronzes . . . 97
Microgravity; Effect on solidification . . . 709
Microstructures; Aluminum bronzes . . . 97
Modification; Measurement in aluminum alloys . . . 159
Mold and core coatings; Products and processes . . . 463
Mold processes; Low pressure for high integrity aluminum . . . 785
Mold; Metal reactions . . . 29
Molybdenum; Effect on ductile iron . . . 557

N

Nickel; Effect on ductile iron . . . 557
Nitrogen; Evaluation of testing procedures in sand . . . 719

O

Oxygen; Removal from copper . . . 155

P

Patternmaking
Computer-aided . . . 21
Use of computers to obtain tighter tolerances . . . 205
Phenolic urethane sand; System for improved hot strength . . . 187
Plasma tensile uses in metallurgy . . . 765
Plasma
Improvement in cupola operations . . . 809
Use in cupolas . . . 323
Porosity; Generation in aluminum castings . . . 753
Pours; Curing with So_2 . . . 917

Q

Quality control; Motivation for change . . . 427

R

Replicast ceramic shell molding process for steel . . . 181
Resistivity as a tool for monitoring heat treatment . . . 9
Risering
Computer model . . . 5
Computer simulation using finite element formulation for heat conduction . . . 373

S

Sand additives; Sodium silicate for improved shakeout . . . 65
Sand inclusions; Studies of origin . . . 277
Sand properties; 8–15% bentonite in green sand . . . 71
Sand; Evaluation of procedures for testing for nitrogen . . . 719
Segregation; Distribution trace elements in compacted graphite iron . 537
Shakeout
Binder to improve . . . 65
Review of methods . . . 109
Silicon; Effect on microporosity in aluminum . . . 47
Sodium silicate; Improved shakeout characteristics . . . 65
Solidification; Hollow cylinder castings . . . 335
Squeeze casting; Strengthening with ceramic fibers . . . 747
Steel
Ceramic filters . . . 85
Cost duplex stainless steel . . . 123
Filters for trapping nonmetallic inclusion . . . 215
Insulated ladles . . . 93
Ladle board linings . . . 477
Welding with ductile iron . . . 879
Steels; Replicast ceramic shell molding process . . . 181
Strain hardening; Austempered ductile iron . . . 577
Strontium; Effect on zinc aluminum . . . 225

T–V

Thermal analysis; Quality evaluation in aluminum castings . . . 797

V-process; Dimensional tolerances . . . 343
Vacuum; Effects in V-process . . . 657
Vibratory drives . . . 485

W

Wastewater; Design of systems for treatment . . . 663
Wastewaters; Modifying system to meet new standards . . . 689
Water treatment; Pilot wastewater system . . . 663
Welding
Cast irons . . . 133
Heat affected zone microstructures . . . 133
Overview . . . 195
Properties of ductile joined with steel . . . 879
White iron
Control of solidification structure . . . 403
Fracture toughness and mechanical properties . . . 503
Impact fracture behavior . . . 297
Wear resistance . . . 403

Z

Zinc aluminum; Effects of strontium . . . 225
